3M DBI-SALA R550 Rescue System – Oil & Gas; a compact & portable at height rescue system designed specifically for rescues from drilling and service rigs. The rescue system is comprised of various subcomponents that can be used to facilitate a rescue from most working locations on the structure. System content is organized and secured creating a simple to use organized Industrial Rescue System.

3M DBI-SALA R550 Rescue System – Oil & Gas is a compact & portable at height rescue system designed specifically for rescues from drilling and service structures. The rescue system is comprised of various subcomponents including a cable grab and a web grab that can be used to

facilitate a rescue from the crown, monkey board, ladder or other work locations on the structure. The rescue systems also incorporates two different anchor web slings and multiple carabiners. A carabiner with a 2" gate that is connected to the R550 along with an edge protector and a micro pulley allows for anchoring the system and still providing protection for the rescue rope of the R550. Fall protection for tools is incorporated for all contents in the bag. Pictorial label cards provided forin EA pocket allow for quick location identification and proper product setup and use. System content is organized and secured within designated pockets creating a simple to use and organized Industrial at Height Rrescue system for workers at height with a rated lifting point integrated on top of the bag.

Specifications
